

## **CITTIO FORMS WATCHTOWER MSP PARTNERSHIP WITH C.A.S.S., Inc.**

SAN FRANCISCO, July 23, 2005 – CITTIO, Inc., the innovation leader in network monitoring and operations software, today announced a partnership with C.A.S.S., Inc., a premier provider of technology systems integration, security protection and network management. Under terms of the agreement, C.A.S.S. will use the CITTIO WatchTower product as the foundation for offering network monitoring and operations to its customers as a managed service.

“Monitoring and maintaining a reliable network is a critical challenge that requires a dedicated real-time service. C.A.S.S., Inc. knows that a proactive, preventative approach to network monitoring saves companies. We have long provided network monitoring types of services to our customers, but with the dramatic changes in network environments and the high demand in network availability, we need a system that is proven and on the cutting edge. After evaluating a number of solutions as the foundation for our new CASS Sentinel MSP offering, WatchTower stands alone as being the most affordable and comprehensive program for service providers.”

WatchTower simplifies network management, while delivering the most cost-effective, easy-to-use enterprise monitoring software on the market. By leveraging CITTIO’s platform-agnostic, Web-based architecture, along with discovery, built-in alarms and notifications, automatic latency monitoring, graphing, and thresholding, WatchTower is helping businesses of all sizes operate their networks with greater assurance. With the new WatchTower version introduced this fall, C.A.S.S. can take advantage of multi-tenancy capabilities, allowing managed service providers to monitor many clients’ networks from a single system.

In partnering with CITTIO, C.A.S.S. will now have the ability to proactively monitor and manage client servers, routers, switches applications and databases all from a centrally managed web-enabled dashboard.

### **About CASS., Inc.**

C.A.S.S., Inc. is a premier provider of technology systems integration, security protection and network management.
