

CITTIO WATCHTOWER POWERS PROFITS FOR MANAGED SERVICE PROVIDERS (MSPs) DELIVERING NETWORK MANAGEMENT ON DEMAND

*More than 10 New MSPs Leverage CITTIO Product, Resources, and Expertise to
Build Sustainable Businesses*

SAN FRANCISCO, October 26, 2005 –CITTIO Inc., the award-winning innovator in network monitoring and operations software, announced that more than ten new systems integrators and managed service providers have joined with it to deliver network monitoring services on demand. These organizations, which operate in the U.S. and Canada, are creating high-margin, high-value business with WatchTower™ and CITTIO's expertise in network operations management.

“Delivering on demand network monitoring is central to creating predictable revenues through programs that bring value to our customers and increase the ‘stickiness’ of our relationships with them,” said Robert Stants, president of C.A.S.S., Inc. “We evaluated several vendors before deciding to partner with CITTIO. WatchTower’s ease of use, its low starting cost, and lack of ‘gotcha’ add-ons made it a no-brainer. And the fact that the CITTIO team will help work toward our success is a tremendous added benefit.”

“Margins in the technology VAR business are notoriously thin as customers demand deeper discounts on hardware they perceive as a commodity,” said Jamie Lerner, chief executive officer of CITTIO. “In addition to our corporate client base, we are also helping our partners create entirely new business models around network monitoring for the equipment they sell, which in turn makes them strategic partners for their end-customers. This is only possible because of the inherent ease of use, rapid set-up, and cost-effective nature of WatchTower.”

Since launching the company, CITTIO has signed more than 30 VARs, including more than ten in the last two months alone. Some of these include:

- **Accipiter** (Raleigh, NC; London, U.K.) – an online advertising technology leader since 1996, empowering Web publishers, media networks and eTailers to maximize revenue and reduce operating costs through innovative online ad management and behavioral targeting technologies.
- **Alliance Technologies** (Toronto, Ontario) – leading high performance computing vendor and Linux systems integrator with clients in the power and life sciences industries, as well as academic and industrial research organizations.
- **Computer Analyst Services and Support, Inc.**, (Detroit, MI) – provider of technology systems integration, security protection, and network management. C.A.S.S. Inc. provides premium IT support to the professional industry, specializing in customer applications.
- **Innovation Networks** (British Columbia, Canada) – provides IT systems computer networks and a wide range of services including Internet Presence
- **iTegraNet** (San Ramon, CA) – offers revolutionary telephony solutions for small, medium and enterprise businesses.

- **Itek Systems** (Cleveland, OH) – is a full-service MSP and connectivity and security integrator that provides service and support to LANs and WANs in addition to complete managed and monitored network solutions.
- **SourcePath Consulting** (Farmington Hills, MI) – offers comprehensive IT consulting sales and services to small businesses in Michigan. The company offers superior client/server network consulting for small and medium-sized LANs and WANs.
- **Triline Solutions** (Holland, MI) – delivers complete hardware and software solutions in support of local and wide area networks to the manufacturing, healthcare, education, retail, and transportation industries, as well as to law firms and government.

CITTIO's flagship product, WatchTower™ simplifies network management, while delivering the most cost-effective, easy-to-use enterprise monitoring software on the market. Because WatchTower is optimized for large and mid-sized businesses, organizations can monitor multiple networks with a single system, while allowing user groups to view only the performance of their own networks. Some of CITTIO's most visionary partners are enriching their business models by offering WatchTower as a remote network monitoring service to customers with substantial IT requirements but smaller IT budgets and staff. By leveraging CITTIO's platform-agnostic, web-based architecture—along with its capabilities for agent-free discovery, built-in alarms and notifications, automatic latency monitoring, graphing, and thresholding—these resellers are helping small to mid-sized businesses operate their networks with assurance.

I-Span of San Francisco, CA., has been a CITTIO customer since 2003. In addition to offering business development, technical program management, and resource outsourcing, I-Span offers IT management as a managed service. “The WatchTower product has allowed us to significantly increase the MSP side of our business over the past few months,” said Konstantin Vilks, co-founder of I-Span. “In addition, because we were able to finance our WatchTower purchase, we are realizing steady revenue stream even from the first month. From our customers' perspective, they pay a manageable sum each month and don't have the full-time salary that goes with an internal solution. CITTIO's vendor support and advanced design allows I-Span to offer our clients a true value-added business solution.”

About CITTIO, Inc.

CITTIO, Inc. is the award-winning innovation leader in network monitoring and operations software. Based on a 100 percent Java architecture, only WatchTower delivers a fully bundled software solution, including a Web server, an embedded database, and a management portal, providing complete functionality for operating a network data center.
